Appl. No. : 10/750,955 Confirmation N°: 2051
Appl Title: Air filtering chimney to clean pollution from a city and generate electric power
Applicant : Moreno, Mauricio Rodolfo
Inventor Filed : May 01, 2004
TC/A.U. : 2834
Examiner : Nicholas Ponomarenko
Docket N°: N1057

AMENDMENT

Dear Sir,

In response to the Office action of June 16, 2005, please find attached:

Amendments are in a copy showing changes. A replacement copy is also attached.

REMARKS/ARGUMENTS

The examiner has acknowledged that claim 1 is clearly anticipated by Carlson (US 3,894,393). Claims have been amended to reflect the differences with Carlson, which include the difference that in Carlson, the air flow is downward and the water has to be pumped to get to the top of the chimney. In this invention the flow of air is upward because of being a solar system and the water is used to clean the outgoing air and then send down to generate additional electric power.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Best Regards,

MAURICIO RODOLFO MORENO
